Sri Ramakrishna Engineering College

2022 - 2025
B.Tech Information Technology
CGPA : 6.72

Projects

Care Taker App

The mobile application in question has three main features designed to help users ensure their personal safety and health. The first function is the SOS function. It allows users to use phone gestures to send alerts, informing selected contacts of the user's location coordinates and a predefined message. This feature is very useful in emergency situations where immediate assistance is needed.
